

Take it to the Max!

It's time to take your long distance calling to the max. Maximum savings! Maximum quality! Maximum features!

Ridiculous rates like (US) five cents a minute to the United States and Canada. Call quality like a regular phone....and modern features like voice mail, call waiting, three-way calling and caller ID.

And there's more: our MiniMax device allows you to carry on two separate long distance conversations at the same time...e.g. Mommy can call her son in Canada and Daddy can talk to a business associate in Japan!

And that's still not all: you can have your own toll free numbers in the USA, UK or Canada...so that anyone there you want to call you can pick up any phone any time and do so for free! Ideal if you have kids at school or for business. This is maximum value.

Just plug one or two phones into the MiniMax and connect it to your broadband Internet. Then savour all it can do for you, your relationships and your business.

Don't hesitate. Start maxing out your savings today!
